

As an Community Partner of the Pittsburgh 2030 District, ASHRAE Pittsburgh Chapter is excited to announce it's partnership with an organization whose mission is to promote energy efficient buildings within the City. The District's goal is to encourage and educate building owners to renovate, or construct new and existing high-performing facilities.

The goals of the 2030 District are:

For Existing Buildings:

- **Energy Use:** A minimum 10% reduction below the national average by 2015, with incremental targets reaching a 50% reduction by 2030.
- **Water Use:** A minimum 10% reduction below the District average by 2015, with incremental targets reaching a 50% reduction by 2030.
- **Transportation CO2 Emissions:** A minimum 10% reduction below the District average by 2015, with incremental targets reaching a 50% reduction by 2030.
- **Indoor Air Quality :** To be determined by District Partners

For New Buildings, Major Renovations and New Infrastructure:

- **Energy Use:** An immediate 60% reduction below the national average, with incremental targets reaching carbon neutral by 2030.
- **Water Use:** An immediate 50% reduction below the District average.
- **Transportation CO2 Emissions:** An immediate 50% reduction below the District average.
- **Indoor Air Quality :** To be determined by District Partners

The map illustrates the geographical boundaries of the District and the properties. These properties have either committed to work toward the goals of the District, or intend to in the future. For more information about the Pittsburgh 2030 District and a listing of the Property Partners, visit their website at: <http://www.2030districts.org/pittsburgh/about>

Speaker:

Sean Luther, LEED AP ND will be speaking at Cefalo's Restaurant in Carnegie, PA. Sean manages all aspects of the Pittsburgh 2030 District, including convening the District Partners, serving as the primary spokesman, collaborating with GBA and District stakeholders, and tracking progress towards the District's aggressive energy, water, and transportation emission reduction goals. A Pittsburgh native, Sean earned a BS in Political Science and a Masters in Real Estate Development from Clemson University in South Carolina and he is a member of the Urban Land Institute and serves on the Board of Directors for the International Downtown Association.
